

FUNDAMENTALS OF CRASH INVESTIGATION AND RECONSTRUCTION

Virginia Commonwealth University's Transportation Safety Training Center will conduct four **Fundamentals of Crash Investigation and Reconstruction** courses in 2009. The two week course imparts the knowledge and skills required for detailed crash investigation by combining classroom lectures with practical field exercises.

Topics include:

- Coefficient of friction
- Computing speeds from yaw marks and skid marks
- Lamp examination
- Vehicle and occupant kinematics
- Indicators of safety belt use
- Identifying and documenting evidence
- Traffic law
- Measuring the scene
- Scale diagramming
