Date: _____ Test Score: _____ (Passing=70%)

Supervisor's

Name: _____ Signature: _____

True or False

1. _____ Your supervisor does not need to advise you of specific precautions to be taken before working around hazardous chemicals if you have watched this video.
2. _____ To avoid a back injury, always bend and twist when you lift.
3. _____ Defective patient care equipment may be used but should be reported immediately after use.
4. _____ In order to be most effective, MSDSs should be read before you have an emergency spill situation.
5. _____ To avoid harmful exposure, you should move away from the radiation source.
6. _____ You should never try to extinguish a fire if it has grown beyond its incipient (beginning) stage.
7. _____ You should never work around electrical appliances when your surroundings are wet.
8. _____ All Dr. Red situations and drills require that you follow the R.A.C.E.R. procedures.
9. _____ Fire extinguishers should only be used by staff that have been trained within the last 12 months. All others should close the door to the area and continue to follow all other R.A.C.E.R. procedures.
10. _____ If you are injured on the job, it doesn't matter how soon you report the incident to your supervisor.
