## The 2011 Performance Ranking of Scientific Papers for World Universities

The 2011 Performance Ranking of Scientific Papers for World Universities is released by the National Taiwan University. Formerly known as the HEEACT Ranking, this program offers annual performance rankings for world universities based on the production and impact of their scientific papers.

The Performance Ranking of Scientific Papers for World Universities is a stable and reliable ranking for universities devoted to scientific research. It is entirely based on statistics of scientific papers which reflect three major performance criteria — research productivity, research impact and research excellence. This year, in addition to the overall performance ranking, we also offer six field-based rankings and 13 subject-based rankings. We are committed to continually updating and releasing new annual overall, field and subject rankings in the future. For more information about our ranking program, please go to:
